

## Product Data Sheet

### DTEA II

#### Description :

DTEA II is a powerful organic penetrating agent and organic dispersant for use in commercial and industrial water systems. It disperses hydrocarbon and organic contaminants for easy removal by blowdown or side stream filtration. DTEA II has a quick degradation rate and has a favorable environmental profile.

#### Benefits :

- Penetrates, disperses and eliminates organic mass from cooling water systems.
- Reduces corrosion by keeping metal surfaces free of organic based deposition.
- Allows you to use less biocide due to cleaner surfaces.
- Extends oxidizer residuals, lowering use and cost.
- Effective over a wide pH range.
- Biodegradable
- Not affected by high ammonia or high sulfur content.
- Contact us when using with Glutaraldehyde

**Feedrate :** Slug Dose

**Typical Dose :** 50 – 100 ppm, ( 6 fl oz / 1,000 gal ). Frequency, 1 – 3 times / wk

#### Properties :

Color	Off white to light amber
pH	6 - 7
Density	8.3 lbs / gal
