

Product Data Sheet

J-Poly 201A

Polyacrylate Scale Inhibitor

Description :

J-Poly 201 A is derived from polyacrylic acid. It is stable to 550 F and functions over a wide range of conditions for Boiler and Cooling Water programs as a scale inhibitor and dispersant.

Properties :

Total Solids %	50 %
Specific gravity (77 F)	1.25
pH	3.6
Solubility in water	Complete
