

BIO-SOURCE, INC.

Product Data Sheet

Myacide GA 15

Description :

Myacide GA 15 is a 15 % aqueous solution of Glutaraldehyde. This material is especially effective in controlling slime forming bacteria, sulfate-reducing bacteria and algae in recirculating cooling water systems, air washers, pasteurizers, reverse osmosis and other recirculating systems, i.e., closed loop.

Benefits :

- Able to remove established Bio-Film and inhibit growth
- Broad spectrum activity, kills both Aerobic and Anaerobic organisms
- Chemically compatible with most common scale and corrosion inhibitors and dispersants
- Effective over a broad pH range
- Nonfoaming
- Water soluble
- Compatible with halogens, i.e., Bromine / Chlorine

Feedrate : Slug Dose

Initial Dose : 42 – 85 fluid ounces per 1,000 gallons of water in system.

Subsequent Dose : 17 – 42 fluid ounces per 1,000 gallons of water in system.

Properties :

Glutaraldehyde, min %	15.0 %
Specific gravity (20 C)	1.04
pH	3.6
Solubility in water	Complete
